Your Submitted Press Release

Romania, 31st Jul 2025 – ADO Protocol, an innovative Web3 project dedicated to enhancing decentralized finance (DeFi) with real-world utility, has officially launched its Initial Exchange Offering (IEO) on the P2B Exchange. Central to this launch is ADO Swap, an advanced decentralized exchange (DEX) designed to provide significantly lower fees, superior security, and complete transparency for cryptocurrency traders.

Transforming DeFi Trading: What Sets ADO Protocol Apart?

In a rapidly expanding DeFi landscape often filled with speculative hype, ADO Protocol stands out by addressing genuine market needs: cost-effective trading solutions and robust security measures. Following a strategic repositioning in 2024, ADO Protocol's mission crystallized around delivering smarter, cheaper, and safer crypto trading experiences.

Introducing ADO Swap: Lower Fees & Enhanced Security

Launched concurrently with the IEO, ADO Swap is fully operational and already setting new industry standards:

- **Exceptionally Low Trading Fees:** Standard transactions incur a mere 0.05% fee, significantly lower compared to popular platforms such as Uniswap (0.25%) and MetaMask Swaps (0.875%).
- **Private Mode with MEV Protection:** Traders can choose a secure private trading mode for only 0.1%, safeguarding transactions from front-running bots and MEV attacks.
- **No Hidden Fees:** A transparent fee structure ensures traders retain maximum value from their transactions.
- **Complete Transparency:** On-chain analytics confirm that there are no hidden payouts or MEV-related issues affecting users' assets within liquidity pools.

Benefits for Both Traders and Projects

For Traders:

- Obtain more tokens from each trade.
- Benefit from built-in MEV protection.
- Enjoy a smooth and efficient trading experience.

For Crypto Projects:

- Improved liquidity management capabilities.
- Retention of 100% DEX fees for integrated Uniswap V3 pools, fostering sustainable growth and increased financial stability.

Upcoming Features and Development Roadmap

- Website Widget Integration: An easy, no-code solution allowing crypto projects to embed ADO Swap directly into their websites seamlessly.
- FIAT On-Ramp: Integration to enable straightforward crypto purchases with traditional fiat currencies, expanding accessibility and user convenience.

Strong Industry Validation

ADO Protocol's innovative approach has received acknowledgment from the Ethereum Foundation, highlighting its equitable fee structure and robust MEV protection as significant advancements in the DeFi sector.

Participate in the ADO Protocol IEO on P2B

The ADO Protocol IEO is live on P2B Exchange, providing retail and institutional investors with the opportunity to acquire the \$ADO token, an integral component driving future secure, efficient, and truly decentralized crypto trading.

Trade smarter. Pay less. Stay protected.
Experience the innovation of ADO Swap today.
