Your Submitted Press Release

Sydney, Australia — Leading Australian plant nutrition brand **CompleteGrow** has announced the release of its newest innovation — the **Advanced Formula NPK 4-18-38 + Calcium & Magnesium** — a powerful yet precise **fertiliser for fruit trees** engineered to enhance growth, flowering, and fruit quality across all Australian growing conditions.

This professional-grade blend delivers the perfect balance of **nitrogen (N)** for healthy leaf development, **phosphorus (P)** for strong roots and flowering, and **potassium (K)** for improved fruit sweetness, firmness, and colour. Enriched with **calcium and magnesium**, it helps prevent nutrient deficiencies and strengthens cell structure — ensuring longer shelf life and higher yields.

“Fruit trees require consistent, balanced nutrition — not just more fertiliser,” said a spokesperson for CompleteGrow. “Our new NPK formula provides what fruit trees actually need for sustained performance — from citrus and stone fruit to mango and apple trees.”

Designed for Precision Feeding

Unlike traditional feeds that deliver nutrients unevenly, CompleteGrow’s **fruit tree fertilizer** is **fully water-soluble** and formulated for both **liquid and foliar applications**. Its low-nitrogen, high-potassium ratio (4-18-38) encourages compact, healthy canopies and high-quality fruit set without overstimulating soft leaf growth.

This makes it ideal for growers seeking sustainable nutrient programs that improve both productivity and soil balance.

Whether you spell it **fertiliser** or **fertilizer**, CompleteGrow’s **NPK for fruit trees** represents a breakthrough in efficiency and control for growers across Australia.

Key Benefits

Promotes vigorous root growth and flowering through optimal phosphorus levels

Enhances fruit colour, sugar content, and firmness via potassium-rich formulation

Improves nutrient uptake with added calcium and magnesium

Fully soluble — perfect for drip, foliar, and hydroponic feeding systems

Safe for all fruit varieties including citrus, stone fruit, apples, figs, and avocados
