Your Submitted Press Release

Credit Shield has announced the launch of its dedicated credit monitoring platform, providing consumers with comprehensive access to their credit scores and financial reports. The software functions as a central tool for individuals to track their credit standing, offering immediate notifications when changes occur to their credit profiles.

Designed to give users early visibility into their credit health, [Credit Shield](#) gathers data from the three major credit bureaus: Experian, Equifax, and TransUnion. The service allows members to view their credit profiles before lenders do, ensuring they remain informed about their financial status and protected against potential identity theft.

The platform relies on a straightforward three-step process: monitor, detect, and alert. By continually tracking users' financial data, Credit Shield's systems scan for suspicious activity 24 hours a day, 365 days a year. To date, over 1,000 members trust the platform, which has helped prevent more than \$10 million in financial fraud.

"Our objective is to give people a clear view of their credit activity and the tools they need to protect their identities," a spokesperson for Credit Shield stated. "Whether it is an unexpected hard inquiry or a new account opened in their name, our members receive fast alerts so they can act immediately."

Credit Shield offers a complete protection suite that extends beyond traditional credit score tracking.

Key features of the software include:

- **Real-Time Tracking:** Daily monitoring of credit scores with clear, easily interpreted charts to track changes over time.
- **Credit Utilisation and Spending Insights:** Tools to track debt and credit usage, helping users understand their overall financial health.
- **Dark Web Monitoring:** Continuous scanning of the dark web to detect compromised personal information, including Social Security Numbers.
- **Instant Alerts:** Immediate notifications regarding hard and soft inquiries, new account openings, and other suspicious financial account activity.

Available for \$32 per month, the standard plan provides complete access to all monitoring tools, along with 24/7 expert customer support. Credit Shield also offers an annual subscription plan that includes a 20 percent discount. The service features flexible payment options, no hidden fees, and a 15-day money-back guarantee, allowing users to cancel at any time.

For further information regarding Credit Shield or to sign up for credit monitoring services, visit <https://creditshield.ai>.

About Credit Shield

Credit Shield is a financial software company dedicated to comprehensive identity protection and credit monitoring. By delivering real-time data, actionable insights, and threat detection, the organization equips its members to manage their credit profiles and defend against fraud.
