Your Submitted Press Release

ZH, Switzerland, 2nd Feb 2026 - Today, Global Inspector AI revealed that pre-orders for its next-generation investigative intelligence platform are now open. The platform will be available as both a mobile app and a web-based solution. People in the private sector, businesses, financial institutions, and public sector organisations, such as government offices, can all use the platform. Advanced data intelligence, investigative processes, and cross-source verification are all combined in Global Inspector AI into a single safe space. It gives people the power to look into people, businesses, digital traces, assets, and risks with a level of detail and organization that was previously only available to professional intelligence and compliance teams.

Because it is built to support a wide range of use cases, the platform can be used for:

- Due diligence and background checks;
- Asset and identity investigations;
- Photo identification and research;
- Domain, email, phone, and infrastructure verification;
- Crypto-asset and blockchain intelligence;
- DarkNet and DarkWeb intelligence;
- Corporate, compliance, and security risk analysis

Public entities from around the world and international organisations can pre-order the Global Inspector AI ecosystem to get early access and early deployment options, and to join the ecosystem before it goes on sale to the public. Global Inspector AI is not like consumer search tools or general AI platforms; it is designed to be a professional-grade investigation environment that works with Swiss data-protection standards, enterprise-grade security practices, and legal intelligence and compliance processes.

This solution is perfect for:

- Private people who need information that can be checked and defended;
- [Businesses and investors](#) doing risk and transaction analysis, mergers and acquisitions, activity checks, due diligence, and background checks;
- Law firms, compliance teams, and security providers;

– **Public authorities and government** entities looking for structured intelligence and verification tools

The main platform, www.globalinspector.ai, is now open for pre-orders worldwide.

Global Inspector AI will be released in stages, with early pre-order customers getting access, onboarding, and integration choices before anyone else.

About Global Inspector AI

Global Inspector AI is a new, next-generation mobile and web app (SaaS platform) created in Switzerland that uses AI for digital intelligence and verification. It's meant to help people do thorough background checks and risk assessments on people, companies, digital assets, social media accounts, DarkNet data, blockchain data, phone numbers, emails, photos, and more to keep themselves safe from crime, financial loss, and other threats. As the creator and owner of the Global Inspector AI, Swiss Security Solutions LLC uses a multi-brand strategy to meet the needs of the global security, investigation, and intelligence market. It does this by offering a range of trademarked brands, such as Securely Swiss® for high-end security services. Swiss Security Solutions helps people, companies, and the public in their communities by offering customised security, safety, investigation, intelligence, and defence systems, services, and solutions. They do so to make private, business, and public customers feel safe. Swiss Security Solutions is confident that its security services are unique and unlike any other. To ensure the optimal protection of people, property, data, and investments, Swiss Security Solutions requires a special combination of knowledge, skill, professionalism, and a strong desire. Security and intelligence options that are right for you can be gotten from Swiss Security options LLC.
