Your Submitted Press Release

iFLYTEK, a global leader in AI and technology, has unveiled its latest innovation, the AINOTE 2, marking a significant leap in the productivity device market. Officially launched on October 14, 2025, the AINOTE 2 is officially recognized by Guinness World Records as the thinnest E-ink tablet, a groundbreaking achievement that pushes the boundaries of portability and efficiency. Originally priced at \$649, pre-sale priced at \$599, the device combines an ultra-slim profile with state-of-the-art AI technology, designed to enhance productivity for professionals across various industries.

The Slimmest E-Ink Tablet on the Market

iFLYTEK launches the AINOTE 2, officially recognized by Guinness World Records as the thinnest E-ink tablet, with an average thickness of 4.2 mm (0.165 in). Despite its sleek design, it houses a 4000 mAh high-capacity battery, ensuring long-lasting usage even during extended working hours. For business consultants, journalists, and legal professionals constantly on the go, the device's thin form factor allows it to easily fit into briefcases or bags, making it the perfect companion for business travel or fieldwork.

AI-Powered Features Designed for Professionals

The AINOTE 2's standout feature is its integration with GPT-5 AI technology, which provides users with the ability to generate meeting minutes, summarize complex documents, and draft reports with minimal effort. This AI support is particularly valuable for professionals like lawyers, who can utilize the device to quickly organize case notes or generate document drafts, reducing manual effort and enhancing productivity.

A Paper-Like Writing Experience for Focused Work

In addition to its AI capabilities, the AINOTE 2 features an 10.65-inch E-Ink display that simulates the feel of writing on paper, offering a distraction-free environment. The low-latency writing technology ensures that every stroke is captured in real-time, making it ideal for long writing sessions or academic research. This focus on providing a paper-like experience sets it apart from traditional tablets, which often rely on bright screens and frequent notifications that can disrupt workflow.

iFLYTEK's AINOTE 2 represents a significant advancement in the evolution of productivity tools. By integrating a world-record-thin design, GPT-5-powered AI, and an innovative paper-like display, the AINOTE 2 is positioned to meet the needs of today's professionals—offering a tool that enhances both efficiency and focus. With its launch in October 2025, the AINOTE 2 is expected to become a go-to device for those in need of a high-performance, portable, and intelligent productivity solution.
