Your Submitted Press Release

In a move that underscores its commitment to scalable automation and open system architecture, Lakshmi Finance Center, led by Jonathan Dale Benton, has released a new feature for its flagship platform, TradeGenius AI 4.0: the Logic Module Marketplace.

The marketplace allows users to access, remix, and deploy ready-made automation components, ranging from signal filters to full multi-stage strategies. With the launch, TradeGenius AI 4.0 users can now build sophisticated workflows by assembling interoperable modules from a growing ecosystem of contributors.

“We’re turning trading strategy design into a truly modular experience,” said Jonathan Dale Benton. “This is about empowering system builders—from startups to institutions—with reusable logic they can trust and adapt.”

Marketplace Highlights:

Pre-built components for signal generation, market entry conditions, position sizing, and rebalancing

Versioned logic structures that track edits and enable safe rollback

Cross-asset compatibility, including equities, forex, and digital assets

Community tagging and ratings, helping users find modules by category and performance

Team collaboration layer, enabling organizations to develop private, reusable logic libraries

Each module is reviewed by the Lakshmi team before publishing, ensuring base-level technical stability and clarity. Modules can be imported into TradeGenius’s no-code builder or enhanced with script overlays for advanced customization.

The move is expected to lower the barrier for users with limited programming skills while accelerating build time for more experienced quant developers.

The Logic Module Marketplace is already being used by several early-access institutions to prototype intraday strategies and replicate portfolio-level allocation logic across different markets.

Lakshmi Finance Center also confirmed that an incentivized contributor program will launch in May, rewarding high-quality module creators with tokenized reputation scores and feature placement.

“We envision a decentralized ecosystem of strategic logic, where innovation becomes iterative, not siloed,” added Mei-Lin Zhao, Head of Product Systems. “This is the future of

adaptive automation.”

About Lakshmi Finance Center

Lakshmi Finance Center is a systems innovation firm known for developing intelligent, ethical automation tools for enterprise and individual use. Since its founding by Jonathan Dale Benton, the organization has focused on modular design, transparency, and adaptive intelligence across complex domains.
