# Your Submitted Press Release

**KERDOM**, a leading innovator in mobility solutions, proudly announces the launch of the **E100L (Model DX04)**, the brand's lightest and most compact electric wheelchair. Created to meet the everyday needs of seniors, caregivers, and travel enthusiasts, the E100L is designed for those who seek independence, convenience, and comfort in one lightweight package.

## Redefining Mobility for Seniors and Caregivers

Alongside its functional strengths, the E100L offers a sleek silver frame that brings a modern, clean aesthetic. Its [Lightweight and Travel-Friendly Wheelchair](#) design does not compromise on durability or support, and its simple folding mechanism makes it a smart choice for users looking to avoid bulky, hard-to-store mobility devices.

With a total weight of just **33 lbs (without battery)**, the E100L is KERDOM's lightest wheelchair to date and among the most travel-friendly on the market. Crafted with aviation-grade aluminum, this chair combines a strong yet ultra-light frame that makes it easy for caregivers and seniors to lift, carry, and store the wheelchair without strain. Its foldable design allows users to collapse the chair in just **three seconds**, making it quick storage in cars, closets, or airplane compartments.

This level of portability is especially valuable to those who frequently travel. The [wheel chair](#) is airline-approved and fully compliant with TSA and FAA guidelines. Whether boarding a plane, taking a road trip, or enjoying a cruise, users can take this wheelchair with them easily and confidently.

## Flexible Battery Options and Long Range Performance

The E100L features flexible power options that allow users to choose between a standard 24V 12AH lithium-ion battery or a dual 24V 20AH upgrade. The standard battery offers a range of up to 15 miles per charge—more than enough for daily activities—while the dual battery setup doubles the range to 30 miles, ideal for longer outings or travel days. Batteries are easily removable for charging and are compliant with air travel regulations.

## Designed for Everyday Comfort and Practical Use

Comfort is at the heart of the E100L's design. The wheelchair features an ergonomic, breathable seat with generous padding, ensuring a pleasant experience throughout the day. The seat cushion measures 17.5 inches wide by 16 inches deep, and the floor-to-seat height is 19 inches, offering a comfortable posture for most adult users. The armrests can be raised for easier side access, and the joystick controller can be mounted on either the left or right side for user convenience.

With two 250-watt brushless motors, the E100L offers smooth operation across various terrains, including grass, ramps, gravel, and pavement. It features a top speed of 3.7 mph,

a tight turning radius of 22 inches, and a climbing capability of up to 12 degrees, making it highly maneuverable in both indoor and outdoor environments.

"With the E100L (Model DX04) , we're not just launching a wheelchair — we're delivering freedom. Seniors and caregivers deserve mobility solutions that are practical, stylish, and truly portable," said Kevin, CEO of KERDOM.

### **Built to Last, Backed by Guarantees**

KERDOM has paired innovation with customer reassurance. The E100L comes with a five-year warranty on the frame, a seven-day no-questions-asked trial, and a 60-day return and exchange policy. These policies are designed to give customers peace of mind, ensuring they can make their purchases with full confidence and flexibility.

With the launch of the E100L (Model DX04), KERDOM continues its mission of designing mobility solutions that empower users to live independently, travel freely, and enjoy life without limits. Tailored for seniors who value autonomy, caregivers who prioritize portability, and travelers who require a compact and dependable wheelchair, the E100L sets a new standard in electric mobility.

### **About KERDOM**

KERDOM is a trusted brand committed to redefining modern mobility. Specializing in high-quality electric wheelchairs and ergonomic seating solutions, KERDOM designs products that combine smart functionality with everyday practicality. With a focus on seniors, caregivers, and individuals with mobility challenges, KERDOM empowers users to live independently, comfortably, and confidently. All products are crafted with user-first design, robust engineering, and are backed by industry-leading warranties and support.
