Your Submitted Press Release

As the global hygiene and nonwoven markets enter a new era of sustainability and high-speed production, Foshan Nanhai Mingyang Machinery Manufacturing Co., Ltd. ([Mingyang Machinery](#)) today highlights its role as a primary architect of this industry-wide transformation.

Technological Roots, Global Reach

Founded in 2012, Mingyang Machinery has spent 14 years bridging the gap between traditional manufacturing and the digital future. While 2024 marked a pivotal year with the launch of its dedicated Overseas Business Platform, the company has since matured into a global brand synonymous with reliability and intelligence.

"Our story is not just about machines; it's about the people who use the products those machines create," says the spokesperson for Mingyang. "The upgrade of our technology comes from an awareness of needs—from the care for a newborn to the standards of a premium hotel. This human-centric approach is what drives us to keep innovating in 2026 and beyond."

Innovation as a Core Identity

Mingyang's reputation is built on solving "impossible" industry challenges. Its technological milestones continue to serve as benchmarks for the sector:

- **The Power of Flexibility:** The industry-pioneering **Dual-Purpose Machine** (Tissue and Nonwoven) remains a bestseller, enabling manufacturers to pivot production instantly and reduce unit costs by 30%.
- **Sustainable Output:** The **Hanging Cotton Soft Towel** production line, perfected in recent years, minimizes material waste to an unprecedented 1.5%. With a single-line output of 40,000 bags daily, it enables clients to meet massive market demands with minimal environmental footprint.

A 14-Year Journey of Trust

With 30+ patents and a world-class team of 20+ engineers, Mingyang Machinery has moved beyond being an equipment supplier to becoming a "One-Stop Solution" partner. From Southeast Asia to the Middle East, and across Europe to the United States, Mingyang provides a seamless journey from equipment customization to comprehensive operation and maintenance training.

About Mingyang Machinery

Headquartered in Foshan, China, Mingyang Machinery is a leading manufacturer of high-end tissue and nonwoven processing equipment. With a mission to "Drive the Evolution of Tissue & Nonwoven Products with Intelligent Equipment," the company serves the global medical, maternal, and consumer goods sectors with innovative, high-efficiency production lines.
