Aligned with Elecosoft's established U.S. operations, PEMAC continues to deliver trusted CMMS and reliability software that drives compliance, performance, and sustainability.

HOUSTON --PEMAC, a leading provider of Computerized Maintenance Management System (CMMS) and reliability software, has reaffirmed its commitment to supporting U.S. industry as part of Elecosoft's established North American operations.

With a high-profile customer base across manufacturing, life sciences, energy, healthcare and utilities, PEMAC continues to provide proven maintenance and reliability solutions designed to enhance performance, compliance, and asset longevity.

"PEMAC is firmly established to support the U.S. market," said Donal Bourke, Managing Director, Asset Management, Elecosoft. "Our focus is on strengthening how we serve customers to ensure consistent delivery, sector-specific expertise, and measurable results backed by Elecosoft's local infrastructure and governance."

Building on its success with global manufacturers and regulated industries, PEMAC has introduced a Standardized Partner Framework in North America. This framework ensures consistent implementation and support through certified service providers, giving U.S. organizations confidence in delivery quality, data governance, and ongoing optimization.

The company's CMMS platform serves as the digital backbone for data-driven upkeep, helping organizations:

- Improve asset reliability and uptime through preventive and predictive maintenance.
- Enhance compliance and audit readiness in highly regulated sectors such as life sciences, food, and energy.
- Integrate maintenance strategies across complex operations and multi-sitefacilities.
- Optimize resourcesthrough actionable analytics and real-time performance insights.
- Support sustainability goals by extending asset lifecycles and reducing waste.

According to industry analysts, including ARC Advisory Group and Verdantix, manufacturers are increasing investment in reliability and CMMS technologies to address skilled-labor shortages, extend equipment lifecycles, and meet tightening environmental and safety requirements. These industry trends align with PEMAC's proven strengths in reliability, compliance, and data-driven maintenance, enabling organizations to optimize performance and reduce operational risk.

"PEMAC brings proven capability in asset reliability and compliance that complements Elecosoft's broader portfolio," added David Hernandez, Managing Director, Elecosoft U.S. "Together, we're helping organizations achieve measurable improvements in uptime, safety, and operational efficiency, outcomes that matter to every industrial operator navigating today's cost and compliance pressures."

Looking ahead, PEMAC and Elecosoft will continue helping U.S. organizations strengthen reliability and sustainability through smarter maintenance practices, integrated reliability analytics, and measurable performance improvements.

About PEMAC

PEMAC, an Elecosoft company, provides Computerized Maintenance Management System (CMMS) and reliability software to help organizations enhance compliance, improve asset reliability, and optimize maintenance operations. Trusted by global leaders in manufacturing, life sciences, energy, and utilities, PEMAC supports data-driven maintenance strategies that extend asset lifecycles and reduce unplanned downtime.For more information, visit www.pemac.com.

About Elecosoft

Elecosoftdevelops and delivers market-leading software and services to drive efficient project delivery, asset management, and data-driven decisionmaking across construction, manufacturing, and property management sectors. With offices in the UK, U.S., and Europe, Elecosoft's solutions empower organizations worldwide to plan, manage, and optimize complex assets throughout their lifecycle.For more information, visit www.elecosoft.com.
