Your Submitted Press Release

SogaWorks, a global leader in on-demand manufacturing, today launched its cutting-edge CNC Machining Instant Quote engine. This innovative feature marks a significant milestone in SogaWorks' mission to advance smart manufacturing. The [CNC Machining Instant Quote](#) feature is designed to deliver faster, more precise quotes, enabling businesses to streamline product development and boost their competitive edge.

SogaWorks' CNC Machining Instant Quote Feature Now Available

Since 2020, SogaWorks has invested heavily in artificial intelligence and automation. Its proprietary AI-driven quoting engine has transformed the traditional CNC machining quoting process. Powered by advanced machine learning algorithms, the engine analyses 3D model geometry, material specifications, and production parameters in real time, generating accurate quotes in seconds. Compared to conventional manual quoting, SogaWorks' Instant Quote feature slashes quoting time by up to 95% while maintaining an error margin of less than 1%.

"We're thrilled to introduce our CNC Machining Instant Quote feature," said Chris Tian, CEO of SogaWorks. "This tool empowers businesses to turn ideas into reality with unmatched speed and precision. At SogaWorks, we're committed to driving the digital transformation of manufacturing, with AI at the core of our vision."

The CNC Machining Instant Quote engine supports milling, turning, and multi-axis machining, accommodating materials such as aluminium, steel, and titanium alloys. Customers can simply upload a 3D model to receive a detailed quote, including material costs, machining time, and surface finish options. The platform also offers Design for Manufacturability (DFM) feedback, helping clients optimise designs to reduce costs and avoid production issues.

As a customer-centric company, SogaWorks provides tailored manufacturing solutions for clients, from startups to global corporations. Whether for rapid prototyping or small-batch production, this feature ensures high-quality, precision-engineered parts that meet the rigorous demands of industries like aerospace, medical devices, and automotive.

About SogaWorks

Headquartered in Shenzhen, SogaWorks is a global provider of on-demand manufacturing services, including CNC machining, 3D printing, injection moulding, and polyurethane casting. Its AI-powered platform redefines manufacturing efficiency, offering instant quotes, automated production management, and exceptional quality control. SogaWorks is dedicated to empowering clients to stay ahead in a fast-evolving market through relentless innovation.

By the end of 2025, SogaWorks plans to expand its Instant Quote engine to include sheet metal fabrication and enhanced 3D printing capabilities, addressing a broader range of manufacturing needs. Looking ahead, the company will continue to invest in AI and cloud technologies to deliver smarter, more efficient manufacturing solutions to its global clientele.
