# Your Submitted Press Release

**Sydney, Australia, 5th Sep 2024** - In a world where technological innovation is the key to competitive advantage, visionAI stands at the forefront of transforming industries through the power of artificial intelligence (AI). The company's vision is clear: to revolutionize how manufacturers and supply chain organizations operate by democratizing the use of computer vision AI, making it accessible, effective, and transformative.

At its core, visionAI is about empowering businesses to do more with what they already have. By leveraging existing CCTV infrastructure, visionAI's platform uses cutting-edge AI to drive enhanced outcomes in key areas such as waste reduction, quality improvement, workforce efficiency, machine downtime reduction, and safety.

The result? A more streamlined, efficient, and safer operational environment without the need for significant upfront investments or lengthy contracts.

## **visionAI's Unique Software-as-a-Service (SaaS) Model**

Unlike traditional enterprise solutions that often require costly implementations and long-term commitments, visionAI offers seamless remote deployment in small bite-sized decision chunks. A first engagement allows the client and visionAI to ascertain fit.

A unique low-cost Business Case Assessment is then provided with clarity on payback and a personalised demonstration using client-provided video or CCTV feed. From that demonstration the client can decide to Go Live with no lock-in contract. This approach not only lowers the barrier to entry for businesses but also ensures that the technology delivers tangible value from day one.

## **A Commitment to Safety, Privacy, and Excellence**

visionAI's [innovative approach has not gone unnoticed](#). The company has been recognized multiple times as Microsoft's AI Partner of the Year, a testament to its leadership and excellence in the field of artificial intelligence. But visionAI's commitment goes beyond innovation; it extends to safety and privacy, which are paramount in today's digital landscape.

One of visionAI's standout features is its focus on enhancing safety within the workplace. The platform provides real-time insights and alerts in hazardous situations, such as driver

danger zones, enforcement of safety rules around forklifts, and monitoring the security of truckloads. Immediate notifications are sent to stakeholders via email and WhatsApp, allowing for swift responses to potential threats.

Moreover, visionAI takes worker privacy seriously. By incorporating facial blurring technology, the platform ensures that individuals' identities are protected while still providing the necessary operational surveillance and analysis. This balance between security and privacy is a hallmark of visionAI's approach, ensuring that businesses can operate safely and responsibly.

## **Democratizing AI: A Vision for the Future**

visionAI's mission extends far beyond simply providing a technological solution. Their goal is to democratize computer vision AI, making it accessible to businesses of all sizes, and enabling them to unlock the full potential of their visual data. This democratization is about more than just technology—it's about empowering the future of work, where human expertise and AI capabilities collaborate seamlessly to drive progress.

This isn't just a company, it's a movement toward a more connected, efficient, and responsible future. By providing businesses with the tools they need to optimize their operations, visionAI is helping to create a world where AI is a co-pilot in the quest for excellence.

## **Building Community and Driving Positive Change**

Beyond the business impact, visionAI is deeply committed to making a difference in the communities it serves. As a proud member of Mint Group, visionAI has partnered with the Ekukhanyeni Relief Project, an initiative focused on uplifting underserved communities through education, healthcare, and sustainable development. This partnership is a reflection of the company's core values—using technology not just to drive profits, but to drive positive change.

For them, success is measured not only by the achievements of their clients but also by the impact they have on society. By choosing visionAI as a technology partner, businesses are not just investing in cutting-edge solutions—they are joining a movement that believes in giving back and creating a better future for all.

## **The Path Forward**

As Managing Director of visionAI in the Asia-Pacific region, Peter Whalley brings a wealth of expertise in managing global operations, driving growth strategies, and leading SaaS companies. His leadership forms the foundation upon which visionAI APAC is built.
