Your Submitted Press Release

New York, NY, United States, 11th Nov 2025 - Warranties.Homes today announced the launch of its consumer platform designed to help households understand appliance coverage options and the costs associated with common repairs. As part of the launch, the company is publishing The Complete Guide to Appliance Insurance & Home Warranty Coverage 2025, a reference that compiles current repair cost ranges and reliability trends across major appliance categories.

Developed by Warranties.Homes, the platform organizes plain-language resources on how home warranty coverage typically works, what's commonly included or excluded, and how service fees compare with one-off repair bills. The site also provides access to the new 2025 guide for readers who want a deeper look at national repair cost patterns, and what gain they get from using a home warranty plan.

"Households are asking for clearer information before they face an unexpected breakdown," said Jeff Linden, senior analyst at Warranties.Homes. "With this launch, we're putting the essentials in one place and making the underlying research easy to reference."

The 2025 overview evaluates 15 key household appliances, including refrigerators, ovens, dishwashers, washing machines, and dryers. Consistent with prior years, the data shows repair costs have risen over the past decade. Minor repairs often begin below \$200, while complex jobs can exceed \$1,000. Refrigerators remain among the costlier items to service, with average repair costs surpassing \$250, an increase of roughly 20 percent since 2010. Contributing factors include inflation, higher labor rates, and the addition of advanced components such as sensors, control boards, and smart features.

"Warranties.Homes provides customers who face ever-increasing repair costs the option to calculate their expected costs and weigh them against the purchase of a home warranty plan", says Jeff Linden. "We aspire to have the most scientific and data-oriented tool in this space that does a deep delve into an area that is often opaque by reading into the fine print of each company's home warranty plan, and provide consumers with a precise comprehension of what appliances and systems are covered, and to what degree, under what limitations"

The Warranties.Homes platform and the 2025 guide are available now at <https://warranties.homes/>

About Warranties.Homes

Warranties.Homes was founded in 2025 and is owned by Jeff Linden. Headquartered at 1234 Industrial Park Drive, Suite 200, Springfield, IL 62703, USA. Warranties.Homes publishes research and resources focused on appliance repair costs, home maintenance trends, and warranty coverage information for homeowners across the United States. The company's core services include consumer research and reports, educational resources,

product comparisons, and tools for understanding warranty terms.
