Your Submitted Press Release

Seoul, South Korea, 21 October — ZAMICA announces the upcoming Initial Exchange Offering (IEO) and P2B Exchange listing of its governance token, \$ZAMIC, introducing a practical bridge between traditional finance (TradFi) and decentralized finance (DeFi).

The launch offers a new approach to gold participation via gold-linked ZAM, while allowing participants to pursue additional on-chain income opportunities through ZAMICA's programs using \$ZAMIC.

Real Yield, Backed by Real Activities

ZAMICA introduces a hybrid DeFi model that merges blockchain innovation with regulated financial operations — offering predictable, asset-connected returns to investors worldwide.

Unlike speculative tokens that depend solely on price fluctuations, \$ZAMIC is built around a sustainable ecosystem powered by real-world financial mechanisms, including:

- High-yield traditional savings programs
- Web3-based decentralized lending protocols
- Microfinance initiatives supporting small businesses and education in developing regions

“ZAMICA was founded on the belief that true innovation lies in delivering financial benefits not only to crypto-savvy investors but also to populations in developing countries with low crypto literacy,” said Sanghoon Park, Media Representative of ZAMICA.

“By combining gold-backed tokens with a Web3-based P2P lending platform, ZAMICA offers both stability and profitability to investors while ensuring broader inclusion in the platform's growth. To achieve this, the project diversifies its revenue streams through decentralized lending operations, high-yield deposits with traditional financial institutions, and participation in microfinance initiatives. Deposited assets — including gold-collateralized funds — are expected to be utilized by partner institutions as loan capital, thereby contributing to improved financial accessibility for underserved communities.”

A Bridge Between Trust and Innovation

Operating on the Binance Smart Chain (BEP-20), ZAMICA combines blockchain transparency, efficiency, and accessibility to create a robust DeFi–TradFi connection.

Within its ecosystem, ZAMICA issues two interconnected tokens:

- ZAMIC (\$ZAMIC) — the platform's governance and utility token, used for participation in programs, access to platform services, and ecosystem growth incentives.
- ZAM — a gold-linked token, representing value equivalent to physical gold and serving as the foundation for ZAMICA's yield and lending mechanisms.

Holders of ZAM can:

- Earn monthly rewards through deposit programs backed by real financial activities.
- Access decentralized lending markets for sustainable, collateralized liquidity.
- Participate in ESG-focused and microfinance lending initiatives that promote inclusion.
- Enjoy stable, transparent growth tied to tangible, real-world value.

This dual-token structure enables ZAMICA to deliver both digital innovation and financial trust, allowing users from both the crypto and non-crypto worlds to participate in a secure, yield-oriented ecosystem.

Social Impact Through Finance

ZAMICA integrates social inclusion into its business model by empowering real economies through gold-collateralized financial products.

By depositing gold-collateralized funds into banks that issue savings products backed by physical gold, ZAMICA enables those banks to enhance their liquidity and lending capacity, thereby contributing to economic progress in developing regions.

In parallel, ZAMICA issues its native gold token, ZAM, in proportion to the deposited collateral—bridging digital assets with real-world value and expanding access to stable income opportunities.

“Our vision is to make finance a driver of inclusion and progress,” adds Park. “ZAMICA's system connects digital efficiency with traditional security—turning blockchain innovation into tangible global benefit.”

Upcoming IEO and Exchange Listing

ZAMICA's Initial Exchange Offering (IEO) will launch exclusively on P2B Exchange, giving early supporters the opportunity to participate in one of 2025's most promising DeFi–TradFi integrations.

IEO Date: October 21, 2025

IEO Link: <https://p2pb2b.com/token-sale/ZAMIC-845/>

Following the IEO, \$ZAMIC will be officially listed on P2B Exchange for public trading.

About ZAMICA

ZAMICA is a South Korea – based Web3 fintech project developing a dual-purpose gold-tokenization ecosystem that merges blockchain transparency with the stability of traditional finance.

By linking its platform to real-world TradFi activities - such as gold-collateralized savings deposits, high-yield savings products, and participation in microfinance lending - ZAMICA offers stable and accessible income opportunities to users worldwide.
